INVESTMENT STRATEGY

The aim of the fund, classified as "Bonds and other international debt securities" is to achieve, over the recommended 2-year investment period, a net performance above that of capitalised 3-month Euribor +150 basis points by investing in a portfolio of issuers screened from the perspective of their compatibility with the energy transition strategy. In addition, the sub-fund undertakes to have a weighted average of the portfolio's greenhouse gas emissions per euro invested (scopes 1 and 2) at least 50% lower than that of the composite benchmark indicator: 50% Bloomberg Global Aggregate Corporate Index + 50% ICE BofAML BB-B Global High Yield Index. This objective of reducing greenhouse gas emissions shall be permanent and respected at all times.
