Registered in: FR NL CH LU BE IT ES DE

KEY FIGURES

NAV : 1,003.82€
Fund size : €168.50M

SYNTHETIC RISK INDICATOR

INVESTMENT HORIZON

Maturing in 31/12/2026

CHARACTERISTICS

Legal form : Sub-fund of the French SICAV LA FRANCAISE

AMF Classification : International bonds and other debt securities

Inception date : 29/11/2019

Allocation of distributable amounts : Distribution and/or capitalization

Currency : EUR

Valuation frequency : Daily

Clients : All subscribers

Major risks not taken into account by the indicator : credit risk, counterparty risk, Impact of techniques such as derivative investments

COMMERCIAL INFORMATION

ISIN code : FR0013458239

Bloomberg Ticker : LFC26ID FP Equity

Cut-off time : D before 12:00 am CET

Settlement : D+2 business days

Min. initial subscription : 100 000 EUR

Eligibility for PEA : No

Max. subscription fees : 3%

Max. redemption fees : 0%

Management fees and other administrative and operating expenses : 0.68%

Transaction costs : 0.49%

Custodian : BNP Paribas SA

Administrator : BNP Paribas SA

Management company : Crédit Mutuel Asset Management

Portfolio Manager(s) : Akram GHARBI, Aurore LE CROM, Delphine CADROY, Victoire DUBRUJEAUD, Emma GAYRARD

INVESTMENT STRATEGY

The fund's objective is to achieve, over the recommended investment period of 7 years from the fund launch date until 31 December 2026, a net return which is greater than the performance of the French government's euro bonds maturing in 2026, by investing in a portfolio of issuers filtered primarily according to ESG criteria and analysed with regard to their compatibility with the energy transition on the basis of a methodology defined by the Management Company. The fund will aim for the weighted average of the portfolio's greenhouse gas emissions per euro invested (scopes 1 and 2) to be at least 50% lower than that of a comparable investment universe, which would be the composite 30% Bloomberg Barclays Global Aggregate Corporate Index 70% ICE BofAML BB-B Global High Yield Index.

NET PERFORMANCES

The figures quoted relate to previous years. Past performance is not a reliable indication of future performance. This performance does not take into account the fees and costs for the issue and redemption of units.

ESG IMPACT INDICATORS

The aim of the performance indicator data used above is to outperform the universe. The raw data for the ESG indicators (E, S, G and HR) are published once a year by the companies. Calculations are based on the latest data available.

Criteria	ESG impact indicators	Measure		Coverage ratio	
		Funds	Universe	Funds	Universe
Environnemental	Carbon Intensity	106.54	253.94	98.69%	88.57%
Societal	% of women on the Board of Directors	26.78%	21.29%	80.39%	72.08%
Governance	ESG linked bonus	31.01%	25.01%	31.01%	25.01%
Human rights	Human rights policy	58.30%	46.05%	58.30%	46.05%

1st performance indicator : Carbon Intensity | 2nd performance indicator : ESG Linked Bonus

Source : Crédit Mutuel Asset Management

DEFINITIONS OF EXTRA-FINANCIAL TERMS

ESG score : the ESG score measures the overall ESG quality of a company. It is calculated as a weighted-average of the three factor scores (ES, HC and OS) using sector-specific weights. The ESG scoring of the investment universe is automated and allows for adjustments to reflect additional information available to the ESG analysts as appropriate.

Environmental Sustainability : the first factor of La Française's ESG model assesses companies' performance and strategies for reducing the environmental impacts of their operations and wider value chain.

Human Capital : the second factor of the ESG model assesses companies' policies, programs and performance to manage and develop their workforce.

Organisational Sustainability : the third factor of the ESG model assesses the quality of companies' corporate governance practices and their management of stakeholder relations (e.g. suppliers).

Carbon Impact Score: The Carbon Impact score is calculated as a simple average of indicators for each category of the TCFD (Task Force on Climate-Related Financial Disclosures) at company level, and can be adjusted to reflect additional information available to the ESG analysts as appropriate.

Carbon Intensity: The carbon intensity of a company is calculated as the ratio between the volume of greenhouse gas (GHG) emissions of the company in tonnes of CO2eq and the turnover.

Carbon Footprint : carbon indicator of the financed emissions of companies in our portfolio in tons of CO2 per million EUR invested. The CO2 calculation model is provided by La Française, based on data provided by CDP. It covers scopes 1 and 2. The calculation is the following : $\sum (i \text{ to } n) (\text{investment } i / \text{Enterprise value}) / (\text{Current portfolio value}) \times \text{Issuer's emissions } i$

Green Bonds : A green bond is issued by a company and its use of proceeds are used to finance or refinance projects which are compliant with the "green bond principles" eligible use of proceeds taxonomy.

Low Carbon : The low carbon classification results from a proprietary carbon analysis. If a company belongs to this category it means that its carbon intensity pathway is well below the reference 2 degrees scenario (not to say 1.5°C) of its sector.

Transition aligned : The transition aligned classification results from a proprietary carbon analysis. If a company belongs to this category it means that its carbon intensity pathway is aligned or below the reference 2 degrees scenario of its sector.

Ambition required : The ambition required classification results from a proprietary carbon analysis. If a company belongs to this category it means that the company is doing material efforts to curb CO2 emissions but that its carbon intensity pathway is not yet aligned or below the reference 2 degrees scenario of its sector.

Laggards : The laggards classification results from a proprietary carbon analysis. If a company belongs to this category it means that it doesn't do enough against climate change related risks and opportunities and its carbon intensity pathway is well above the reference 2 degrees scenario of its sector.

Women on board (%) : Percentage of women on the Board of Directors (%); Number of women directors/total number of directors.

Human rights policy (%) : Number of companies with a human rights policy (%).

ESG-Linked Bonus : Percentage of companies that have included ESG objectives in the criteria for awarding variable remuneration.

DISCLAIMER

Disclaimer: Simplified and non-contractual document.

Document for the use of both non-professional and professional investors – Please read the disclaimer on the last page – Non contractual document. Before subscribing, please refer to the fund prospectus available on the internet : www.creditmutuel-am.eu. Data : Crédit Mutuel Asset Management, Bloomberg

The information contained in this document (themes, investment process, portfolio holdings, etc.) is valid on the date indicated but is subject to change. No reference to a ranking, rating or award constitutes a guarantee of future results and is not constant over time.

The information contained in this document does not constitute an offer or solicitation to invest, nor does it constitute investment advice, a recommendation on specific investments or legal advice. The figures are not contractually binding and are subject to change.

Information on the fund, including performance calculations and other data, is provided by the management company at the date of the document. These performances do not take into account fees and expenses relating to the issue and redemption of units or taxes. The value of investments and the income derived from them may go down as well as up and the investor may not get back the full amount originally invested. Changes in exchange rates may also affect the value of the investment. For this reason, and given the initial charges usually levied, an investment is not generally suitable as a short-term investment. Fees and expenses have an adverse effect on the fund's performance.

Past performance is no guarantee of future performance and is not constant over time. Investing in a UCI can be risky, the investor may not get back the money invested. If you wish to invest, a financial adviser will be able to help you assess the investment solutions that match your objectives, your knowledge and experience of the financial markets, your assets and your sensitivity to risk, and will also explain the potential risks.

The tax treatment of holding, acquiring or disposing of shares or units in a fund depends on the tax status or treatment specific to each investor and may be subject to change. Potential investors are strongly encouraged to seek advice from their own tax advisor.

Although every care has been taken in the preparation of this document, we make no representation or warranty of any kind, express or implied (including to third parties) as to the accuracy, reliability or completeness of the information contained herein. Any reliance placed on the information contained on this page shall be at the sole discretion of the recipient. The SRI-Label does not guarantee the fund's financial performance.

All the codes of transparency, voting and commitment policies, as well as the sustainable investment charter are available on the La Française Group website (<https://www.la-francaise.com/en/regulatory-information/>)

Issue rating: corresponds to the most recent issue rating between S&P and Moody's or, failing that, of the issuer.

Issuer rating: corresponds to the most recent issuer rating between S&P and Moody's.

The management company does not exclusively or mechanically use the ratings established by rating agencies and performs its own credit analysis. Ratings are determined on a case-by-case basis on the basis of an internal methodology and are subject to change.

SFDR Classification : The Sustainable Finance Disclosure Regulation aims to direct capital flows towards more responsible investments, to ensure transparency, consistency and quality of information for investors and thus to allow a comparison of the different investment vehicles. It applies to all financial market players but also to products.

3 categories of products:

1/ Automatically all funds are classified in Article 6, without sustainability objective.

2/ Article 8 applies for funds that promote ESG characteristics.

3/ Article 9 goes further, with a sustainable and measurable investment objective. That is, the funds invest in an activity that contributes to an environmental or social objective, such as reducing CO2 emissions or fighting inequality.

DEFINITIONS

The synthetic risk indicator makes it possible to assess the level of risk of this product compared to others. It indicates the likelihood of this product incurring losses in the event of market developments or our inability to pay you.

Volatility is a measure for the strength of fluctuation in the performance of the fund during a certain period. The higher it is the more volatile and therefore risky a fund is.

The Sharpe Ratio measures the average return earned in excess in dependency of the risk relative to a benchmark (risk-free rate). For the assessment of this key figure, the attainable riskfree yield is subtracted from the yield actually earned. The result is divided by the risk that has been taken by the fund. A Sharpe Ratio > 1 indicates that an excess yield compared to the riskfree money market investment has been earned. At the same time, it shows the ratio of this excess yield to the risk taken. In reverse, a negative Sharpe Ratio (<0) illustrates that the money market interest rate has not been outperformed.

Max.Drawdown: Historical maximum loss that would have been incurred by an investor who invested at the highest and exited at the lowest

The recovery is the time needed to recover the maximum loss (max drawdown).

Modified duration: makes it possible to measure the percentage change, upward or downward, of the price of a bond or of the net asset value of a bond UCITS, induced by a 1% fluctuation of market interest rates.

Average spread: weighted average of the bond spread in the portfolio. For a bond, it represents the difference between the actuarial rate of return and that of a risk-free loan of identical duration. If the creditworthiness of the issuer is perceived to be good, the spread is naturally lower. Calculated on the bond portfolio.
