Registered in: FR CH IT ES AT DE

KEY FIGURES

NAV: 1,151.64€

Fund size : €109.74M

SYNTHETIC RISK INDICATOR

INVESTMENT HORIZON

CHARACTERISTICS

Legal form : Sub-fund of the French SICAV LA FRANCAISE

AMF Classification : International bonds and other debt securities

Inception date : 30/08/2022

Index for comparison : ICE BofAML BB Global High Yield Total Return Index

Allocation of distributable amounts : Capitalization

Currency : EUR

Valuation frequency : Daily

Clients : Institutionals

Major risks not taken into account by the indicator : credit risk, counterparty risk, liquidity risk, Impact of techniques such as derivative investments

COMMERCIAL INFORMATION

ISIN code : FRO014008UJ6

Bloomberg Ticker : LANHEUR FP Equity

Cut-off time : D before 11:00 am CET

Settlement : D+2 business days

Min. initial subscription : 100 000 EUR

Eligibility for PEA : No

Max. subscription fees : 3%

Max. redemption fees : 0%

Management fees and other administrative and operating expenses : 0.76%

Custodian : BNP Paribas SA

Administrator : BNP Paribas SA

Management company : Crédit Mutuel Asset Management

Portfolio Manager(s) : Akram GHARBI, Aurore LE CROM, Paul TROUSSARD

INVESTMENT STRATEGY

The UCI, classified as "Bonds and other international debt securities", has the management objective of obtaining, over the recommended investment period of 3 years, a performance net of fees, superior to that of the BofA BB index. Global High Yield by investing in a portfolio of issuers previously filtered according to ESG criteria and of which at least 60% contribute positively and/or do not present a negative contribution to the SDGs.

NET PERFORMANCES

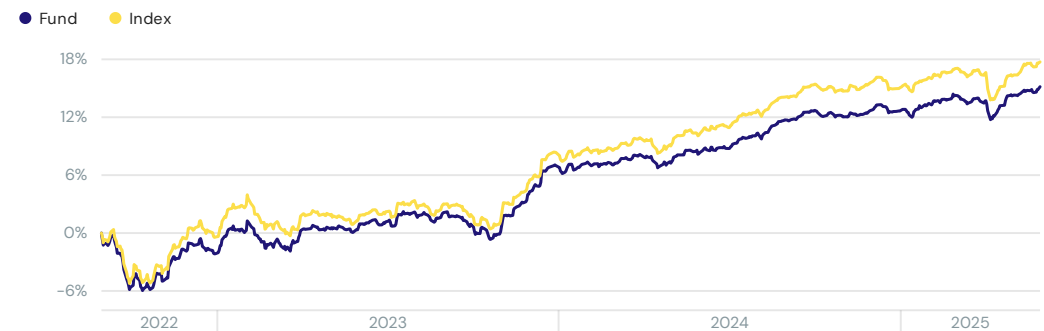

The figures quoted relate to previous years. Past performance is not a reliable indication of future performance. This performance does not take into account the fees and costs for the issue and redemption of units.

DEFINITIONS OF EXTRA-FINANCIAL TERMS

ESG score : the ESG score measures the overall ESG quality of a company. It is calculated as a weighted-average of the three factor scores (ES, HC and OS) using sector-specific weights. The ESG scoring of the investment universe is automated and allows for adjustments to reflect additional information available to the ESG analysts as appropriate.

Environmental Sustainability : the first factor of La Française’s ESG model assesses companies’ performance and strategies for reducing the environmental impacts of their operations and wider value chain.

Human Capital : the second factor of the ESG model assesses companies’ policies, programs and performance to manage and develop their workforce.

Organisational Sustainability : the third factor of the ESG model assesses the quality of companies’ corporate governance practices and their management of stakeholder relations (e.g. suppliers).

Carbon Impact Score: The Carbon Impact score is calculated as a simple average of indicators for each category of the TCFD (Task Force on Climate-Related Financial Disclosures) at company level, and can be adjusted to reflect additional information available to the ESG analysts as appropriate.

Carbon Intensity: The carbon intensity of a company is calculated as the ratio between the volume of greenhouse gas (GHG) emissions of the company in tonnes of CO2eq and the turnover.

Carbon Footprint : carbon indicator of the financed emissions of companies in our portfolio in tons of CO2 per million EUR invested. The CO2 calculation model is provided by La Française, based on data provided by CDP. It covers scopes 1 and 2. The calculation is the following: $\sum (i \text{ to } n) (\text{investment } i / \text{Enterprise value}) / (\text{Current portfolio value}) \times \text{Issuer's emissions } i$

SDG alignment objective: 60% minimum of the net assets of issuers contributing positively and/or presenting no negative contribution to the SDGs, i.e. issuers having obtained a score strictly greater than 0 and up to +10

Women on board (%) : Percentage of women on the Board of Directors (%): Number of women directors/total number of directors.

Human rights policy (%) : Number of companies with a human rights policy (%).

ESG-Linked Bonus : Percentage of companies that have included ESG objectives in the criteria for awarding variable remuneration.

DISCLAIMER

Disclaimer: Simplified and non-contractual document.

Document for the use of both non-professional and professional investors – Please read the disclaimer on the last page – Non contractual document. Before subscribing please refer to the fund prospectus available on the internet : www.creditmutuel-am.eu. Data : Crédit Mutuel Asset Management, Bloomberg

The information contained in this document (themes, investment process, portfolio holdings, etc.) is valid on the date indicated but is subject to change. No reference to a ranking rating or award constitutes a guarantee of future results and is not constant over time.

The information contained in this document does not constitute an offer or solicitation to invest, nor does it constitute investment advice, a recommendation on specific investments or legal advice. The figures are not contractually binding and are subject to change.

Information on the fund, including performance calculations and other data, is provided by the management company at the date of the document. These performances do not take into account fees and expenses relating to the issue and redemption of units or taxes. The value of investments and the income derived from them may go down as well as up and the investor may not get back the full amount originally invested. Changes in exchange rates may also affect the value of the investment. For this reason, and given the initial charges usually levied, an investment is not generally suitable as a short-term investment. Fees and expenses have an adverse effect on the fund's performance.

Past performance is no guarantee of future performance and is not constant over time. Investing in a UCI can be risky, the investor may not get back the money invested. If you wish to invest, a financial adviser will be able to help you assess the investment solutions that match your objectives, your knowledge and experience of the financial markets, your assets and your sensitivity to risk, and will also explain the potential risks.

The tax treatment of holding, acquiring or disposing of shares or units in a fund depends on the tax status or treatment specific to each investor and may be subject to change. Potential investors are strongly encouraged to seek advice from their own tax advisor.

Although every care has been taken in the preparation of this document, we make no representation or warranty of any kind, express or implied (including to third parties) as to the accuracy, reliability or completeness of the information contained herein. Any reliance placed on the information contained on this page shall be at the sole discretion of the recipient. This content does not provide sufficient information to support an investment decision.

The Key Information Document (KID), the management processes and the prospectus are available on the management company's website (www.creditmutuel-am.eu). The KID must be provided to the subscriber prior to each subscription.

Distribution of this document may be limited in certain countries. The UCI may not be marketed in all countries and the offer and sale of the UCI to certain types of investors may be restricted by the local regulatory authority

This UCI may not be offered, sold, marketed or transferred in the United States (including its territories and possessions), nor may it directly or indirectly benefit a US natural or legal person, US citizens or a US Person.

This document may not be reproduced or used without the express authorisation of the management company. Issue rating: corresponds to the most recent issue rating between S&P and Moody's or, failing that, of the issuer.

Issuer rating: corresponds to the most recent issuer rating between S&P and Moody's.

The management company does not exclusively or mechanically use the ratings established by rating agencies and performs its own credit analysis. Ratings are determined on a case-by-case basis on the basis of an internal methodology and are subject to change.

SFDR Classification : The Sustainable Finance Disclosure Regulation aims to direct capital flows towards more responsible investments, to ensure transparency, consistency and quality of information for investors and thus to allow a comparison of the different investment vehicles. It applies to all financial market players but also to products.

3 categories of products:

1/ Automatically all funds are classified in Article 6, without sustainability objective.

2/ Article 8 applies for funds that promote ESG characteristics.

3/ Article 9 goes further, with a sustainable and measurable investment objective. That is, the funds invest in an activity that contributes to an environmental or social objective, such as reducing CO2 emissions or fighting inequality.

DEFINITIONS

The synthetic risk indicator makes it possible to assess the level of risk of this product compared to others. It indicates the likelihood of this product incurring losses in the event of market developments or our inability to pay you.

Volatility is a measure for the strength of fluctuation in the performance of the fund during a certain period. The higher it is the more volatile and therefore risky a fund is.

The Sharpe Ratio measures the average return earned in excess in dependency of the risk relative to a benchmark (risk-free rate). For the assessment of this key figure, the attainable riskfree yield is subtracted from the yield actually earned. The result is divided by the risk that has been taken by the fund. A Sharpe Ratio > 1 indicates that an excess yield compared to the riskfree money market investment has been earned. At the same time, it shows the ratio of this excess yield to the risk taken. In reverse, a negative Sharpe Ratio (<0) illustrates that the money market interest rate has not been outperformed.

Max.Drawdown: Historical maximum loss that would have been incurred by an investor who invested at the highest and exited at the lowest

The recovery is the time needed to recover the maximum loss (max drawdown).

Modified duration: makes it possible to measure the percentage change, upward or downward, of the price of a bond or of the net asset value of a bond UCITS, induced by a 1% fluctuation of market interest rates.

Credit sensitivity : is expressed for a 100 bp variation of credit spread.

Discount margin : is the average expected return of a floating-rate bond that's earned in addition to the index underlying. The size of the discount margin depends on the price of the floating- or variable-rate bond.
