For more information on this product, please call +352 46 40 10 7193, visit www.alger.com or email algerquerydesk@statestreet.com.

This document was produced on 31 March 2023 and is based on key information as at 31 December 2022.

What is this product?

Type:

This product is a UCITS Fund.

Term:

Open Ended Fund.

Objectives:

Alger SICAV - Alger American Asset Growth Fund (the "Fund") is actively managed and seeks long term capital appreciation.

The Fund invests at least two-thirds of its net assets, not including liquid assets, in equities or equity related securities of companies of any size which demonstrate promising growth potential and whose securities are listed or traded on a US stock exchange.

The Fund's benchmark is the S&P 500 Index (the "Benchmark"). The Benchmark is an unmanaged index generally representative of the U.S. stock market without regard to company size. The Fund is actively managed, meaning that it does not intend to replicate the Benchmark but tries to exceed its performance. The Fund is not constrained by the Benchmark. The Benchmark is used for comparison purposes only.

The Fund can invest in financial derivative instruments for hedging purposes and for efficient portfolio management purposes.

Intended retail investor:

This product is intended for investors who are prepared to take on a relatively high level of risk of loss to their original capital in order to get a higher potential return, and who plan to stay invested for at least 5 years. It is designed to form part of a portfolio of investments.

What are the risks and what could I get in return?

Risk Indicator

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level and poor market conditions will likely impact the value of your investment.

Growth stocks may be more sensitive to market, economic and political developments than other stocks, which makes their prices more volatile. The Fund may invest in derivatives which may have a large impact on the Fund's performance.

For other risks materially relevant to the product which are not taken into account in the summary risk indicator, please read the product's Annual Report or Prospectus available at www.alger.com.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Fund over the last 10 years.

The stress scenario shows what you might get back in extreme market circumstances.

Recommended Holding Period: 5 years			
Investment: USD 10,000			
Scenarios		If you exit after 1 year	If you exit after 5 years (recommended holding period)
Minimum: There is no minimum guaranteed return if you exit before 5 years			
Stress	What you might get back after costs Average return each year	950 USD -90.53%	880 USD -38.53%
Unfavourable¹	What you might get back after costs Average return each year	6,300 USD -36.97%	6,190 USD -9.14%
Moderate²	What you might get back after costs Average return each year	11,810 USD 18.11%	20,040 USD 14.92%
Favourable³	What you might get back after costs Average return each year	16,220 USD 62.18%	29,900 USD 24.49%

¹ This type of scenario occurred for an investment between October 2021 and December 2022.

² This type of scenario occurred for an investment between March 2013 and March 2018.

³ This type of scenario occurred for an investment between October 2016 and October 2021.

What happens if Alger SICAV is unable to pay out?

You may face a financial loss should the Management Company or the depositary/custodian, State Street Bank International GmbH, Luxembourg Branch, default on their obligations.

There is no compensation or guarantee scheme in place which may offset, all or any of, this loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the

product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed, in the first year you would get back the amount that you invested (0% annual return). For the other holding period, we have assumed the fund performs as shown in the moderate scenario.

Investment: USD 10,000	If you exit after 1 year	If you exit after 5 years
Total costs	162 USD	1,477 USD
Annual cost impact (*)	1.6%	1.8%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 16.7% before costs and 14.9% after costs.

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	This product does not have any entry costs.	0 USD
Exit costs	This product does not have any exit costs.	0 USD
Ongoing costs taken each year		If you exit after 1 year
Management fees and other administrative or operating costs	1.1% of the value of your investment per year. This is an estimate based on actual costs incurred over the last year.	110 USD
Transaction costs	The costs associated with buying and selling underlying investments for the product.	52 USD
Incidental costs taken under specific conditions		If you exit after 1 year
Performance fees	This product does not have any performance fees.	0 USD

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

This product has no required minimum holding period but is designed for long term investment; you should be prepared to stay invested for at least 5 years.

You can request to take out some or all of your money at any time. You can typically request to buy or sell shares in the Fund on any day on which banking institutions in Luxembourg and the New York Stock Exchange in the United States are open for business (as further described in the Fund's prospectus).

How can I complain?

If you have any complaints about the product, the conduct of the manufacturer or the person advising on the product, complaints can be lodged via the following methods:

- I. Phone: +352 46 40 10 7193
- II. E-mail: algerquerydesk@statestreet.com
- III. Mail: Investor Services, 47 Avenue J.F. Kennedy, L-1855 Luxembourg
