Management company: Crédit Mutuel Asset

Management

Portfolio Manager(s): Gaspard BRAMAT, Thomas

DHAINAUT

Performances prior to 01/10/2018 correspond to the performance of the previous management orientation. Since 01/10/2018, LFIP European Equity is named La Française LUX - Inflection Point Carbon Impact Euro

#### INVESTMENT STRATEGY

The objective of the fund is to contribute to the transition to a low carbon economy while achieving long-term capital growth.

The fund invests mainly in equities issued by Eurozone companies that have committed to reducing their carbon emissions, expanding their low carbon strategy and replacing fossil energy sources with low-carbon emission alternatives.

#### **NET PERFORMANCES**

The figures quoted relate to previous years. Past performance is not a reliable indication of future performance. This performance does not take into account the fees and costs for the issue and redemption of units.

#### **DEFINITIONS OF EXTRA-FINANCIAL TERMS**

ESG score: the ESG score measures the overall ESG quality of a company. It is calculated as a weighted-average of the three factor scores (ES, HC and OS) using sector-specific weights. The ESG scoring of the investment universe is automated and allows for adjustments to reflect additional information available to the ESG analysts as appropriate.

Environmental Sustainability: the first factor of La Française's ESG model assesses companies' performance and strategies for reducing the environmental impacts of their operations and wider value chain.

Human Capital: the second factor of the ESG model assesses companies' policies, programs and performance to manage and develop their workforce.

 $Organisation al \textit{Sustainability: the third factor of the ESG model assesses the \textit{quality of companies' corporate governance practices and their management of stakeholder relations (e.g. \textit{suppliers)}.}$ 

Carbon Impact Score: The Carbon Impact score is calculated as a simple average of indicators for each category of the TCFD (Task Force on Climate-Related Financial Disclosures) at company level, and can be adjusted to reflect additional information available to the ESG analysts as appropriate.

 $Carbon\ Intensity: The\ carbon\ intensity\ of\ a\ company\ is\ calculated\ as\ the\ ratio\ between\ the\ volume\ of\ greenhouse\ gas\ (GHG)\ emissions\ of\ the\ company\ in\ tonnes\ of\ CO2eq\ and\ the\ turnover.$ 

Carbon Footprint: carbon indicator of the financed emissions of companies in our portfolio in tons of CO2 per million EUR invested. The CO2 calculation model is provided by La Française, based on data provided by CDP. It covers scopes 1 and 2. The calculation is the following:  $\Sigma$  (i to n) (investment i / Enterprise value) / (Current portfolio value) × Issuer's emissions i

Cleantech - Carbon / "green" energy solution providers: Companies specializing in clean technologies, generally producers of renewable energy or renewable equipment or companies financing this equipment.

Companies in transition: Companies offering, in our opinion, a very strong potential in terms of carbon reduction.

Companies facilitating the transition: Companies providing the necessary resources for carbon reduction strategies.

 $Women\ on\ board\ (\%): Percentage\ of\ women\ on\ the\ Board\ of\ Directors\ (\%): Number\ of\ women\ directors\ / total\ number\ of\ directors\ .$ 

Human rights policy (%): Number of companies with a human rights policy (%).

ESG-Linked Bonus: Percentage of companies that have included ESG objectives in the criteria for awarding variable remuneration.

#### **DISCLAIMER**

Disclaimer: Simplified and non-contractual document.

The information contained in this document (themes, investment process, portfolio holdings, etc.) is valid on the date indicated but is subject to change. No reference to a ranking, rating or award constitutes a guarantee of future results and is not constant over time.

The country of origin of the fund is Luxembourg. The information contained in this document does not constitute an offer or solicitation to invest, nor does it constitute investment advice, a recommendation on specific investments or legal advice. The figures are not contractually binding and are subject to change.

Information on the fund, including performance calculations and other data, is provided by the management company at the date of the document. These performances do not take into account fees and expenses relating to the issue and redemption of units or taxes. The value of investments and the income derived from them may go down as well as up and the investor may not get back the full amount originally invested. Changes in exchange rates may also affect the value of the investment. For this reason, and given the initial charges usually levied, an investment is not generally suitable as a short-term investment. Fees and expenses have an adverse effect on the fund's performance.

Past performance is no guarantee of future performance and is not constant over time. Investing in a UCI can be risky, the investor may not get back the money invested. If you wish to invest, a financial adviser will be able to help you assess the investment solutions that match your objectives, your knowledge and experience of the financial markets, your assets and your sensitivity to risk, and will also explain the potential risks.

The tax treatment of holding, acquiring or disposing of shares or units in a fund depends on the tax status or treatment specific to each investor and may be subject to change. Potential investors are strongly encouraged to seek advice from their own tax advisor.

The SRI-Label does not guarantee the fund's financial performance.

All the codes of transparency, voting and commitment policies, as well as the sustainable investment charter are available on the La Française Group website ( https://www.la-francaise.com/en/regulatory-information/)

The FNG-Label does not guarantee the fund's financial performance.

All the codes of transparency, voting and commitment policies, as well as the sustainable investment charter are available on the La Française Group website ( https://www.la-francaise.com/en/regulatory-information/)

Manager: Current management team, subject to change with time.

SFDR Classification: The Sustainable Finance Disclosure Regulation aims to direct capital flows towards more responsible investments, to ensure transparency, consistency and quality of information for investors and thus to allow a comparison of the different investment vehicles.

It applies to all financial market players but also to products.

3 categories of products

 $1/\,Automatically\,\,all\,\,funds\,\,are\,\,classified\,\,in\,\,Article\,\,6,\,\,without\,\,sustain ability\,\,objective.$ 

2/Article 8 applies for funds that promote ESG characteristics.

3/Article 9 goes further, with a sustainable and measurable investment objective. That is, the funds invest in an activity that contributes to an environmental or social objective, such as reducing CO2 emissions or fighting inequality.

#### **DEFINITIONS**

The synthetic risk indicator makes it possible to assess the level of risk of this product compared to others. It indicates the likelihood of this product incurring losses in the event of market developments or our inability to pay you.

Volatility is a measure for the strength of fluctuation in the performance of the fund during a certain period. The higher it is the more volatile and therefore risky a fund is.

The Sharpe Ratio measures the average return earned in excess in dependency of the risk relative to a benchmark (risk-free rate). For the assessment of this key figure, the attainable riskfree yield is subtracted from the yield actually earned. The result is divided by the risk that has been taken by the fund. A Sharpe Ratio > 1 indicates that an excess yield compared to the riskfree money market investment has been earned. At the same time, it shows the ratio of this excess yield to the risk taken. In reverse, a negative Sharpe Ratio (<0) illustrates that the money market interest rate has not been outperformed.

Max.Drawdown: Historical maximum loss that would have been incurred by an investor who invested at the highest and exited at the lowest

The recovery is the time needed to recover the maximum loss (max drawdown).

Equity exposure: more precise than the composition of the portfolio, it constantly takes into account ongoing transactions and in particular those carried out on derivative markets, which may increase or decrease management risks depending on market fluctuations.
